Welcome to REST Message Service! - Preethi Sethu Ragunathan

Hello Professor,
Tomcat didn't connect at port 8080 (I tried stopping the Oracle db that was running, still no luck) so I had to manually edit the port number as 8181 server.xml in the conf folder of tomcat7.0 as follows.
and my localhost responds at http://localhost:8181

server.xml — C:\Program Files\Java\Apache Software Foundation\Tomcat 7.0\conf — Atom

File Edit View Selection Find Packages Help

Project

server.xml
